DETAILED ACTION

Claim Objections

Claim 35 is objected to because of the following informalities: please delete the period in claim 35, line 7. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 35 is rejected under 35 U.S.C. 102(b) as being anticipated by US 5,381,944 (Makowiecki). Makowiecki teaches connecting a semiconductor or microelectronic device having one or more electrical contacts to a substrate having one or more receiving contacts (col. 2, ll. 50-65); disposing between the device and the substrate a reactive multilayer foil composed of one or more first regions that can react exothermically to form electrically conductive regions (col. 1, ll. 40-67 and col. 5, ll. 30-40) and one or more second regions which are non-conductive or react to form non-conductive material (col. 1, ll. 40-60); registering the contacts of the device, the contacts of the substrate and the first regions of the foil, pressing the device and the substrate together against the foil; and igniting the foil (col. 4, ll. 10-40).

Response to Arguments

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., a foil reacting to form both conductive and nonconductive regions) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Applicant argues that Makeowiecki fails to disclose a foil reacting to form both conductive and nonconductive regions. The examiner agrees. Applicant, however, does not claim this. Instead, applicant claims "second regions which are non-conductive or react to form non-conductive material" (emphasis added). It is the examiner's position that while Makeowiecki does not teach a foil reacting to form nonconductive regions, Makeowiecki does teach a second region (i.e., silicon, as stated in col. 5, ll. 25-40) that is non-conductive.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 1725

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
